CRITERIA FOR SELECTING SUBJECT(S) FOR PHOTOGRAPHING

2. . . . If the target is unknown and/or a previous photograph has not been taken, the observer takes one. At the same time he records the time of arrival/ departure, whether the target is known or unknown, and records any obvious identifying data such as license plate, apparent nationality, apparent occupation, etc. In addition to the above general visual surveillance, the agents are occasionally provided with photographs of targets the Station believes might visit the compound and on whom we wish a specific alert - such as visiting agent personnel and third country subversives known or believed to be in the area.
